

Hi! We would like to tell you something about Xapron

Xapron is a fashion brand from Waalwijk, The Netherlands. We produce craft leather aprons and accessories. The designs come from our own design team and are then made in a traditional way in the leather workshop in Waalwijk ... handmade and with a great sense of detail.

Rugged, tough, chic or sophisticated? The leather apron collection consists of six smooth leather types and more than 14 different colors. We give you an explanation of the 6 different qualities we offer.

Full grain leather or split leather?

We start with the difference between split leather and full grain leather. The skin is often so thick that it can easily be split into two or even more skin layers. The top layer with the natural drawing is called full-grain leather. Split leather is the layer of skin that lies between the upper and lower layer of the skin.

Different qualities

Kansas

Kansas quality is a cow-hide split leather. Kansas has an extra wax layer for a better protection of the apron and is suitable for normal purposes.

Florida

Florida is also a split leather of cattle. Actually the same as the Kansas. However, the Florida has spent 4 to 5 hours longer in the production process, giving it a more vintage look. This makes the apron more contagious.

Utah

Utah is a full grain leather of buffalo, which is oiled. Utah is a very strong leather and therefore very suitable for the most purposes.

Caiman

The quality Caiman is a full grain cowhide, printed with a crocodile print. This gives the apron a tough look and is easy to maintain. Caiman is very suitable for the use in wet rooms.

Montana

Montana is a luxury full-grain cow leather. It has the specific quality that it will not or barely discolour. Montana leather aprons are durable in use and are easy to clean with a damp cloth. This quality is also very suitable for the use in wet rooms.

New York

New York is a full grain cowhide with a smooth sprayed appearance. In addition to the rest, the leather is impregnated with a water-repellent finish. Very suitable for the catering industry and for the use in wet rooms.

Always wanted to know, how we make our leather aprons? > <https://youtu.be/eVRqJ6H-SDU>

Size Chart

40 cm - this is a short leather apron, which goes around the waist and the thighs.

74 cm - this length is suitable for people smaller than 1.75 m.

82 cm - our most popular size - for people with a length between 1.73 - 1.90 m.

89 cm - the XL version for people with a length between 1.85 and 2.00 m.

* Custom made sizes can be produced on request.

Customize with additional accessories!

Finetune your apron completely to your style and taste with extra accessories. This way you can create for example extra storage space with an extra pocket on your apron. Handy to store your spatulas, notepad, or wallet. The extra pockets are made of the same type of leather and color as the apron itself.

In addition to various sizes of pockets we also have accessories such as a metal ring, waiter holder, a scissor holder, extra extension strap etc. Please inquire about all possibilities.

Make it even more personal with your own logo

To personalize an apron with your own logo, we have 3 options. Stamping, lasering on a label and direct lasering on the apron itself. In addition, it is also possible to personalize the towel band. The last option is the neckband, which can be printed in various colors by means of a transfer print.

Stamp the logo in a leather label

Stamp your logo in the leather label with a logo plate (max. size of the design can be 5 x 4 cm). You only pay once € 70 for realizing the logo plate and there will be no additional costs.

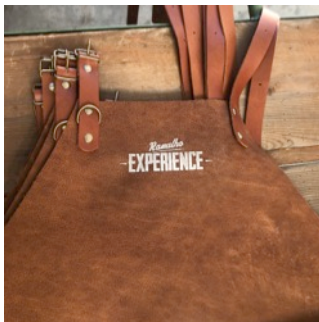

We keep this logo plate in storage so it can be used again for the future orders that you place with us. This option is advantageous for orders from 15 pieces and more.

Laser logo on a leather label

Another option is to have the logo lasered in the leather label (max. size of the design can be 5 x 4 cm). We then burn a thin layer of the leather of with the laser. This leaves a dark impression.

You pay the one-off start-up costs of € 10, - per order, and € 4.00 will be added per lasered label.

Laser logo directly on the apron with whitewash

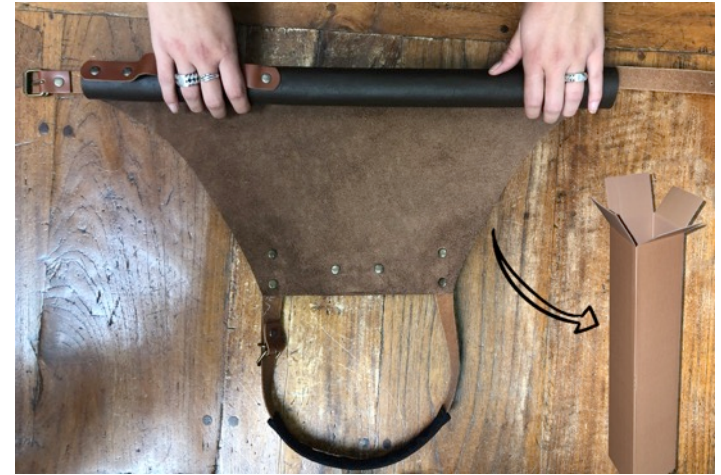

The third option is to laser the logo directly on the leather apron with whitewash (without leather label). Max. size of the design can be 13 x 10 cm.

Here, too, you pay one-off start-up costs of € 10, - per order and a price of € 7.50 is added to each apron.

Pack your products!

We roll up our leather aprons from the outside in order to prevent ugly creases and wrinkles in the leather. After they are rolled up, they go into a craft box. This craft box weighs 300 gr. and has the following dimensions: 70x8x8 cm.

On the packaging we place a sticker with an EAN code, the article number, the color, the amount and the quality. At an additional cost it is possible to personalize the craft box as desired.

Show them off!

Hang the leather aprons clearly in sight with a sturdy scaffolding tube rack. On top of the rack we confirm a display, which is double-sided printed and is currently available in 5 different languages (Dutch / English / German / French / Swedish). For a small surcharge it is also possible to supply your own design for the display.

The rack comes with a simple how-to-install-manual, a display and 10 hooks, for hanging at least 20 aprons.

Has the apron become stiff?
Inflexible leather becomes
smooth again by treating it
with leather spray.

Never treat stains with
corrosive agents such as
gasoline or acetone!

Remove grease stains
carefully with a
suede sandstone.

Use stain and water repellent
colorless leather spray.

Leather may discolor in the full
sun. If the apron has become wet,
leave the apron to dry somewhere
inside at room temperature.

Treat dried drops of water and small stains
with a soft brush, damp cloth, leather sponge
or (for advanced users) with a leather soap foam.
Spots also disappear often by simply rubbing
the leather of the apron against each other.

Enjoy as long as possible of your leather apron!

Leather becomes more beautiful with the years because it is durable and wear-resistant. However, it is important to occasionally clean your apron in connection with bacteria, stains and grease spots. We give you some quick and easy tips to enjoy your apron as long as possible!

Some general information

- All our products can be ordered per piece
- The delivery time is 1 to 5 weeks. Depending on the order size
- There is a lot possible with the personalization. Does your wish not fit in? Let us know and we can see what is possible
